

Mustafa & Kamal Ashraf Trading Co. LLC

CIVIL & MEP CONTRACTING DIVISION

M.K. has an excellent infrastructure to execute turnkey projects. We have a team of qualified and experienced engineers, designers, draftsmen and highly skilled workforce.

We have a large structural steel manufacturing facility, rebar yard, carpentry and aluminium workshop.

We also have a sizeable fleet of cranes, trailers, trucks and construction equipments.

About Us

MUSTAFA AND KAMAL ASHRAF TRADING Co LLC was established in the year 1983 to facilitate its growth in Steel fabrication and Pre-Engineered industry in Oman and GCC. MK Trading further expanded its services into civil contracting, MEP contracting, sandwich panel manufacturing, switchgear manufacturing. We are ISO 9001-2008 certified to ensure its quality in various field of operation.

We are one of the leading industrial contractors in the Sultanate of Oman. We undertake projects on turnkey basis and provide complete end-to-end solution of all the clients requirements. These include Factory building, Extension of existing facility, Logistic warehouses, Commercial complex, Food processing industry, Poultry Houses, Flooring and Machine Foundations.

- MAJAN ENGINEERING CONSULTANT
- BAKER WILKINS & SMITH (QS)
- ROP - DGPM
- MOD - MODES

Industrial floor & Machine foundation

Industrial Floors

Floors are one of the essentials of an industry, we are specialized in constructing industrial flat floors monitored by laser controls. Special floors are with saw cut and steel expansion joints. Accuracy is achieved by adjustable steel formwork, high precision levelling instrument and power trowellers.

Floors are precisely flat and can provide trouble free services for a long time. Also such floors are ideal to receive industrial coating. MK supplies industrial floors to the following markets:

- Manufacturing
- Food and beverages
- Healthcare
- automotive
- Chemical process

Machine Foundation

- One of our strength is construction of quality machine foundations.
- We have constructed highly sophisticated machines foundations for news paper industry, printing industries, cable industries, marble and granite cutting foundation.
- Right form setting out to very high precision (in microns) to bolt casting, pockets, non shrink grout, high strength concrete, insert plate are all with requisite precision.

Quality Policy

We provide service to the customer comparable with the highest quality in our field conforming to specific requirements and cost effective product in the shortest time by the adoption of the right first time principle:

Key element of our philosophy are:

- To exceed customer expectation by ensuring two way communication to enable us fully understand and fulfil their requirements
- Setting measureable targets to monitor our achievements toward predetermined objective
- To evaluate our performance against these targets to identify progress
- To provide appropriate resource and a suitable working environment
- To monitor, audit and review our system to identify areas to continually improve performance.

Mustafa and Kamal Ashraf Trading Company recognise that their staff are the single most important resource in the achievement of this policy and so we encourage a positive and open culture by providing development and training and an atmosphere where two way communication thrives.

Our Policy will ensure that customer requirements are recognised and that consistent control of the requirement is established and maintained.

This quality policy is reviewed annually or as required by changing circumstances in order to ensure its continuing suitability.
